

A Plan of Eating

As a tool, a plan of eating helps us abstain from compulsive eating, guides us in our dietary decisions, and defines what, when, how, where and why we eat.

There are no specific requirements for a plan of eating, nor does it exclude the personal use of one. (See the pamphlets *Dignity of Choice* and *A Plan of Eating* for more information.) For specific dietary or nutritional guidance, OA suggests consulting a qualified health care professional, such as a physician or dietician. Each of us develops a personal plan of eating based on an honest appraisal of his or her past experience. Many of us find it essential to take guidance from our sponsors to develop a plan of eating that reflects an honest desire to achieve and maintain abstinence.

Although individual plans of eating are as varied as our members, most OA members agree that some plan--no matter how flexible or structured—is necessary.

This tool helps us deal with the physical aspects of our disease and achieve physical recovery. From this vantage point, we can more effectively follow OA's Twelve-Step program of recovery and move beyond the food to a happier, healthier and more spiritual life.
