

Dear Friends:

After Reading my very dear friend Sima's report, which had summarized in great detail the program and accomplishments of the WSBC I would find it very difficult to add any significant material that had been left out.

However, I did propose an amendment to Business Motion C, which basically put back the word "surgery" into this business motion. It was defeated. Can't win them all.

I am presently on the Outreach subcommittee which is broken into three parts.

1. **Audit Subcommittee** whose goal is to form a searchable cohesive document list.
2. **Professional Exhibit Subcommittee** whose goal is to develop and supply the documents and other items needed for presentations at various venues.
3. **Wildcard** whose goal is to:
  - a. Scan the ideas that came up to check if it has already been done. If it is and it doesn't need to be reviewed or improved, it will be skipped from the list.
  - b. They are asking in their intergroups and their region service bodies if there is a PIPO so they can get connected to them.
  - c. Promote the workshop of the Virtual Region.
  - d. Find out what information is provided by professionals who offer Bariatric Surgery.
  - e. Look out what is being done in Social Media. Creating a small blurb that can get into the process of approval and then send out so every IG can use it.
  - f. Motivate IGs to translate PIPO material that hasn't been translated yet.

I am on the professional Exhibit subcommittee and have developed a presentation for the medical school community. This will be presented to my subcommittee and refined. If approved by WS I will forward it to IG.

Mikey
